Northwestern Travel Grants

The program is supported by the Northwestern’s International Institute for Nanotechnology and the Tel-Aviv University Center for Nanoscience & Nanotechnology, and is funding mutual visits of students, postdoctoral fellows and faculty members from both partner institutions to encourage collaboration between the two institutes in the Nanoscience and Nanotechnology fields.

The grants will be awarded according to the following criteria:

- The PI has a personal page on the nano center website
- The group PI sent all the material requested for the nano center reports (i.e. scientific report, INNI, etc.)
- The trip will be related to a new technology in the Nanoscience or Nanotechnology field.
- Students or engineers from groups which have not yet received any travel grants for the same academic year will receive preference
- A final report will be submitted one month after the completion of the trip.

The support of the Center should be acknowledged in related presentations and papers.

Maximum individual award amount is $5,000.

Requests should be sent to: infonano@post.tau.ac.il.
Northwestern-Nano Travel Grants

The Center for Nanoscience and Nanotechnology at the Hebrew University of Jerusalem offers travel grants to Northwestern University researchers. These grants are available to researchers at Northwestern University and the Hebrew University of Jerusalem for travel between the two institutions to conduct joint research activities.

Eligibility:

• The lead researcher must be a member of the Hebrew University of Jerusalem's Nanoscience and Nanotechnology Center (INNI).
• All travel expenses must be incurred for research purposes.
• Priority will be given to students, postdoctoral fellows, and researchers who have not previously received travel funds for a scholarly activity.

Applications must be sent via email to: Infonano@post.tau.ac.il

The maximum amount requested is $5,000.
